

Sunstar Hall, Etoy CH

Etoy, Switzerland

Type: Workspace

Location: Etoy, CH

Year: 2013

Client: Sunstar SA

Phase: Schematic

Team: SdARCH Trivelli&Associati, Alhadeff Architects

The Sunstar Hall is a new building located on Route de Pallatex, Etoy in the canton of Vaud in Switzerland. The complete group of buildings that will be the Sunstar World Headquarters will consist of two office buildings and the new Hall. The first and more elongated building is currently in use while the second is under construction and will be operational from June 2015.

The Hall relates to the two office buildings so that the open space between them is strongly characterized. Access to all buildings is from this central open space, a kind of 'piazza' in the middle of the Sunstar campus.

Vehicle and pedestrian access from the Route de Pallatex leads to this central area which is perceived as belonging to a single unit. From this 'room' you can access each of the three buildings in a clear and unambiguous way. The Hall better defines the limits of the overall site while emphasizing the image of a corporate and administrative complex.
